

PROJECT ROLES AND RESPONSIBILITIES

Project Name AI Learning Environment (working name)

Name	Role	Responsibilities
Aubin Chriss Izere	Co-founder, co-project manager and owner of the study core	Feature ownership: plans, builds and tests: • Fall: course folders, the PDF reader, the AI layer and server proxy, page-anchored explanations and the model picker. • Winter: voice input, text recognition for scanned pages and the iPad version. Shared work, accountable for: the low- and high-fidelity prototypes, system architecture, pitches, vlogs and bazaar demos, and the final release and showcase. Also: reviews Chop's pull requests, helps with usability sessions and planning documents, and joins the weekly planning meeting and every instructor scrum.
Chop Kur	Co-founder, co-project manager and owner of practice and Pro	Feature ownership: plans, builds and tests: • Fall: local storage and course history, flashcards and quizzes. • Winter: user accounts, the Pro subscription and payments, usage limits, and spaced review against exam dates. Shared work, accountable for: planning documents, the Kanban board, GitHub repository and scrum updates, the usability questionnaire and sessions, accuracy and performance testing, and the design-partner pilot. Also: reviews Aubin's pull requests, helps with prototypes, pitches and vlogs, and joins the weekly planning meeting and every instructor scrum.
Dr. Tim Maciag	ENSE 400/477 instructor	Sets deliverables and deadlines, reviews progress at workshop check-ins and team scrums, gives feedback on scope and design decisions, and grades the project.
Design-partner students	Test users and research participants	Test the prototype and the working app on their own course files, take part in short feedback sessions, and join the winter pilot.
ENSE 400 capstone peers	Usability testers	Complete the usability tasks and questionnaire on 20 October, and give feedback at pitches and bazaar day.
