ENSE 400 / FINAL PITCH

AI Learning Environment

Study help on the page you're reading

A desktop app that explains the course PDF you're reading, shows the page each answer came from and makes flashcards and quizzes from it.

Software Systems Engineering capstone, University of Regina

Cultivator HQ

Studying with AI still starts with an upload

WHY

Student interview: Linda

“Asking ChatGPT questions can feel awkward when I have to upload files for context. It would be smoother if it could see the file I am studying and explain it.”

Linda, U of R student

Interview summary, paraphrased from team notes

SETUP, EVERY SESSION

Files are uploaded and the course explained again.

ANSWERS YOU CAN’T CHECK

Answers don’t point back to the page they came from.

PRACTICE BY HAND

Flashcards and quizzes are made in another app.

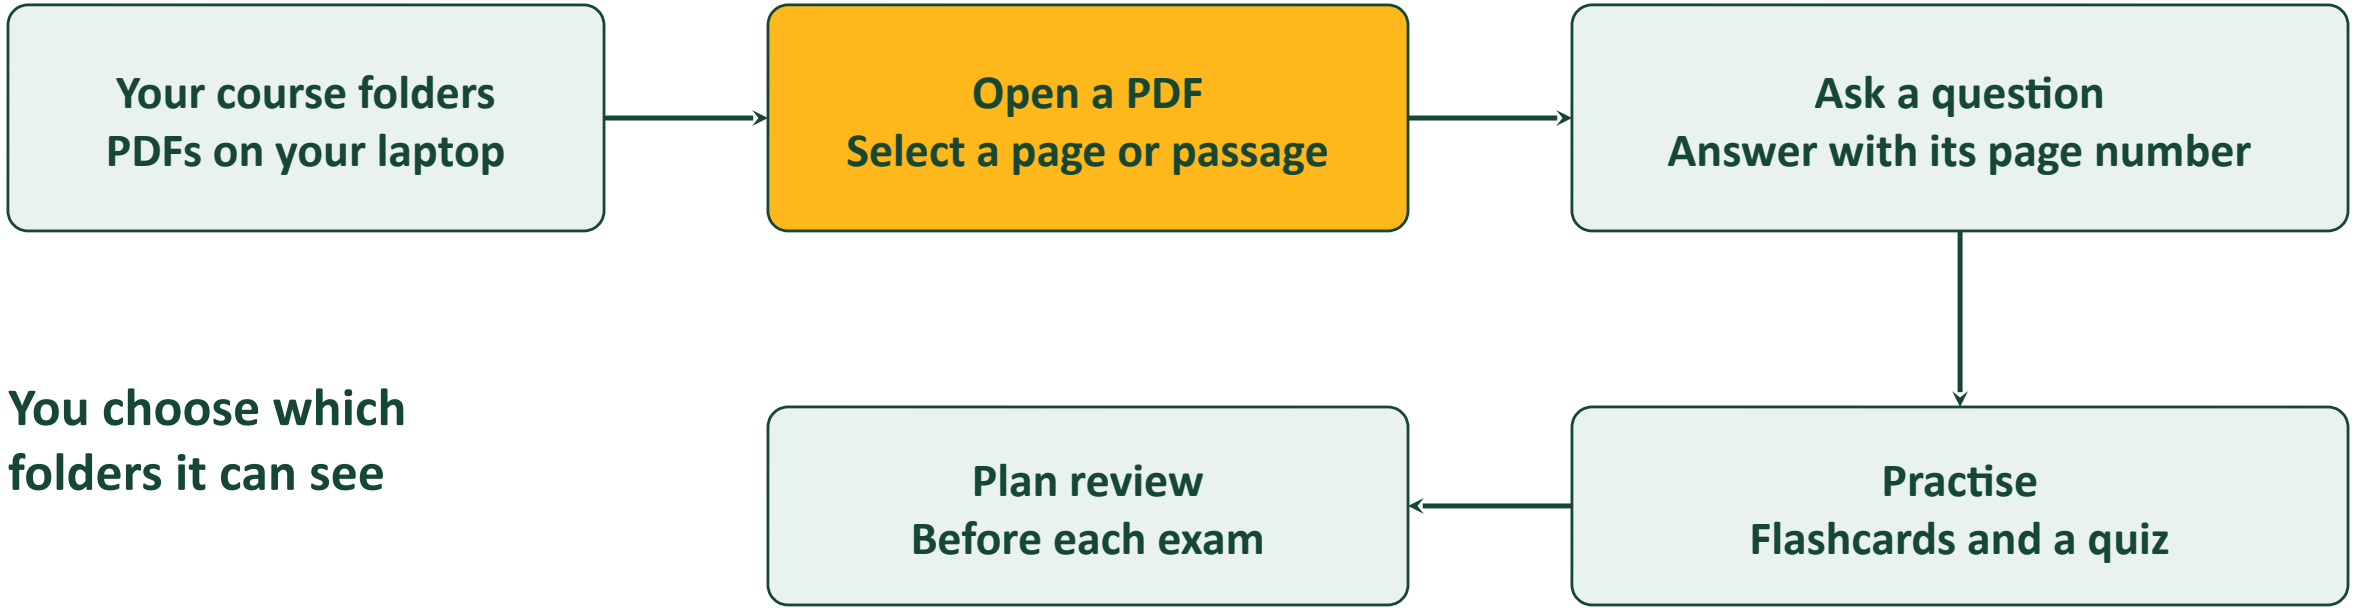

Built for university students who study from course PDFs, starting at the U of R

Illustrative photo, not Linda: Charlotte May / Pexels

From the page to practice, in one app

WHAT + HOW

How a study session works

You choose which folders it can see

Your files stay on your laptop. Only the passage you select goes to the AI.

Desktop app for Windows and macOS first. iPad version in winter 2027.

What makes it different

VALUE + STRATEGY

Existing tool	What it does well	What's missing
NotebookLM	Cited answers, quizzes and flashcards	Every file has to be uploaded first
Adobe Acrobat AI	Questions about a PDF, with citations	One file at a time, no practice
ChatGPT and Gemini	Strong explanations, free to start	Context set up again every session
Anki and Quizlet	Proven spaced repetition	Cards made by hand, no explanations

OUR UNIQUE VALUE

Explains the page you're reading, cites it and turns it into practice

Strategy: win on setup time, not raw answer quality. No uploads and no re-explaining the course.

Free to start, Pro pays for itself

BUSINESS MODEL

Free

$0 for every student

- One course
- Explanations, flashcards and quizzes
- Free AI models
- Weekly usage limit

Pro

Monthly or per term

- Paid AI models for explanations
- Unlimited courses
- Voice input, iPad and planned review
- Monthly usage limit

MODEL PICKER

Cost of one explanation, cheapest first

Model	Cost
Free model (default)	$0
Claude Haiku 4.5	about 0.5¢
Claude Sonnet 5.5	about 1¢
Claude Opus 5.5	about 2.5¢

Paid models unlock with Pro.

Self-funded: up to US$150 over two terms. Free-tier requests cost us nothing.

What we will deliver, and when

NEXT STEPS

Oct 20

PROTOTYPE

Prototypes tested with at least 5 students.

Nov 24

DEMO

Work-in-progress demo at bazaar day.

Dec 1

RELEASE 1

Reader, cited explanations, model picker, flashcards and quizzes.

Apr 2027

RELEASE 2

Accounts and Pro, review before exams, voice input and iPad. Pilot with 15 students.

MINIMUM TARGETS

85%

of answers accurate to the page

50%

less time to a useful answer than uploading to a chatbot

20%

of pilot students would pay for Pro

Any questions?
